About the job

What You'll Do

WebFX developers typically work on 25+ projects per year, so there is a high level of variety in work and two days are never the same!

Our web-based projects use a variety of frameworks selected on a per-project basis. Some of the more popular frameworks our team leverages in projects are WordPress, Magento, Bootstrap, Zend Framework 2, and Google Functions. Training will be provided on all of our core platforms, tools, and technologies.

Responsibilities

- Coordinate and participate in the programming, implementation, testing, and support of web-based projects using modern frameworks such as React.js and Feathers for Node.js
- Program, develop, and produce data-driven web applications, websites, and mobile apps using the latest technology solutions and software
- Consult with clients and the account team to ensure the use of effective Internet-based technologies for enterprise business applications
- Debug and problem-solve across a wide variety of open-source and mobile platforms

Percentage Breakdown

- 45% maintenance and debugging
- 40% building new functionality
- 10% consulting with other team members and clients
- 5% planning and quoting new functionality

Desired Education

- Bachelor's degree in computer science or a related discipline is preferred
- Pre-employment testing is required

General Knowledge

- Fluent in English (written and verbal). Your resume must be in English to be considered.
- Comfortable with both object-oriented and procedural programming methodologies

- Strong knowledge of database design and troubleshooting (MySQL, MongoDB)
- Strong understanding of software development life-cycle and best practices

Who We're Looking For

- Qualities
- Passion for web development
- Likes to get things done
- Commitment to delivering high-quality and defect-free projects to clients
- Ability to work well in a high-concurrency environment (many projects)
- Capable of individual "deep work" as well as the ability to collaborate with a team to complete projects rapidly
- Strong time-management skills and can meet deadlines consistently
- Takes direction well, but also able to make decisions and take initiative
- Strong communication skills
- Ability to work independently
- Up-to-date on the latest web technologies
- Professional, dependable, solid work ethic, detail-oriented, dedicated to quality, self-motivated
- Enjoys solving problems
- Customer-centric mentality

You Must Have Experience With

- At least 2+ years of working web development experience (not just side projects)
- Solid project-level experience with at least one open-source CMS platform such as WordPress, Shopify, Joomla, Drupal, etc.
- Web-based programming languages (e.g. JavaScript, HTML)
- Mobile app development and/or React Native
- Node.js
- Google Cloud Platform or Amazon Web Services
- OOP and procedural programming methodologies
- Standard Compliant HTML, CSS, and JavaScript
- CSS Frameworks (e.g. Bootstrap, Foundation, Intuit)
- JS Frameworks (e.g. jQuery, React.js, Vue, Backbone)
- Git Version control (or other version control software)
- Package management and Task Runners (e.g. NPM, Yarn, Gulp, Grunt)
- Browser testing abilities using built-in developer tools
- E-commerce solutions and be well-versed in e-commerce methodologies and best practices
- Previous development firm/agency environment
- A Plus if you have - TensorFlow and Machine Learning Experience

Requires reliable, high-speed internet access
